COLLEGE, WEGMANS SCHOOL OF  
PHARMACY

SUNDAY, JULY 12, 2009  
WEGMANS SCHOOL OF PHARMACY  
3690 EAST AVE, ROCHESTER NY 14618

*Pharmacy-Based Immunization Delivery* is an innovative and interactive training program that teaches pharmacists the skills necessary to become a primary source for vaccine information and administration. The program teaches the basics of immunology and focuses on practice implementation and legal/regulatory issues.

**The purpose of this educational program:**

1. Provide comprehensive immunization education and training
  2. Provide pharmacists with the knowledge, skills, and resources necessary to establish and promote a successful immunization service
  3. Teach pharmacists to identify at-risk patient populations needing immunizations
  4. Teach pharmacists to administer immunizations in compliance with legal and regulatory standards
- Pharmacy-Based Immunization Delivery* certificate training program is a Practice-based activity conducted in two parts – a self-study learning component and a live training seminar. *A Certificate of Achievement will be awarded to participants who successfully complete all program components.*

**Key learning objectives for the live training seminar:**

- Identify opportunities for pharmacists to become involved in immunization delivery.
- Describe how vaccines evoke an immune response and provide immunity.
- Identify the vaccines available on the U.S. market for each vaccine-preventable disease and classify each vaccine as live attenuated or inactivated.
- Outline the target groups for vaccination based on the Advisory Committee for Immunization Practices recommendations.
- Review patients' medical and immunization histories and determine vaccine recommendations based on current immunization schedules.
- Outline the steps involved in establishing a pharmacy-based immunization delivery program.
- Discuss the legal, regulatory, and liability issues involved with pharmacy-based immunization programs.
- Describe the signs and symptoms of adverse reactions that can occur after vaccination and the emergency procedures for management of patients with adverse reactions to vaccination.
- Describe the appropriate technique for administration of the live attenuated influenza vaccine.
- Demonstrate appropriate intramuscular and subcutaneous injection technique for adult immunization.

For a more complete list of program learning objectives, please go to APhA's website, [www.pharmacist.com/ctp](http://www.pharmacist.com/ctp).

**SEMINAR AGENDA**

- Registration/Check-in
- Welcome, Introductions and Acknowledgements
- Program Overview
- The Importance of Vaccines and The Pharmacists' Role in Vaccine Delivery
